

Lab01: MySQL Server and MySQL Workbench Installation and Configuration

DB Architecture

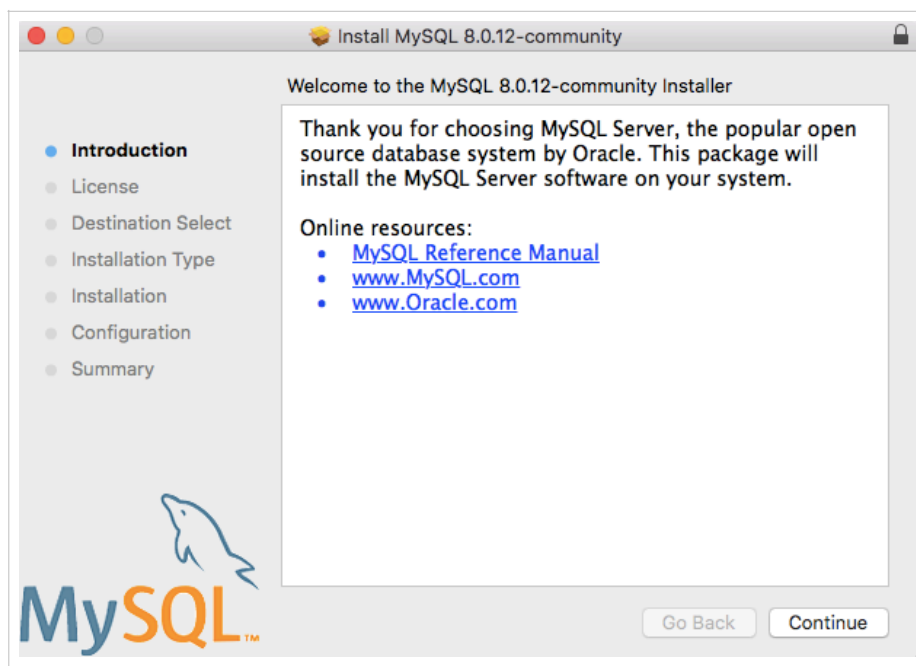

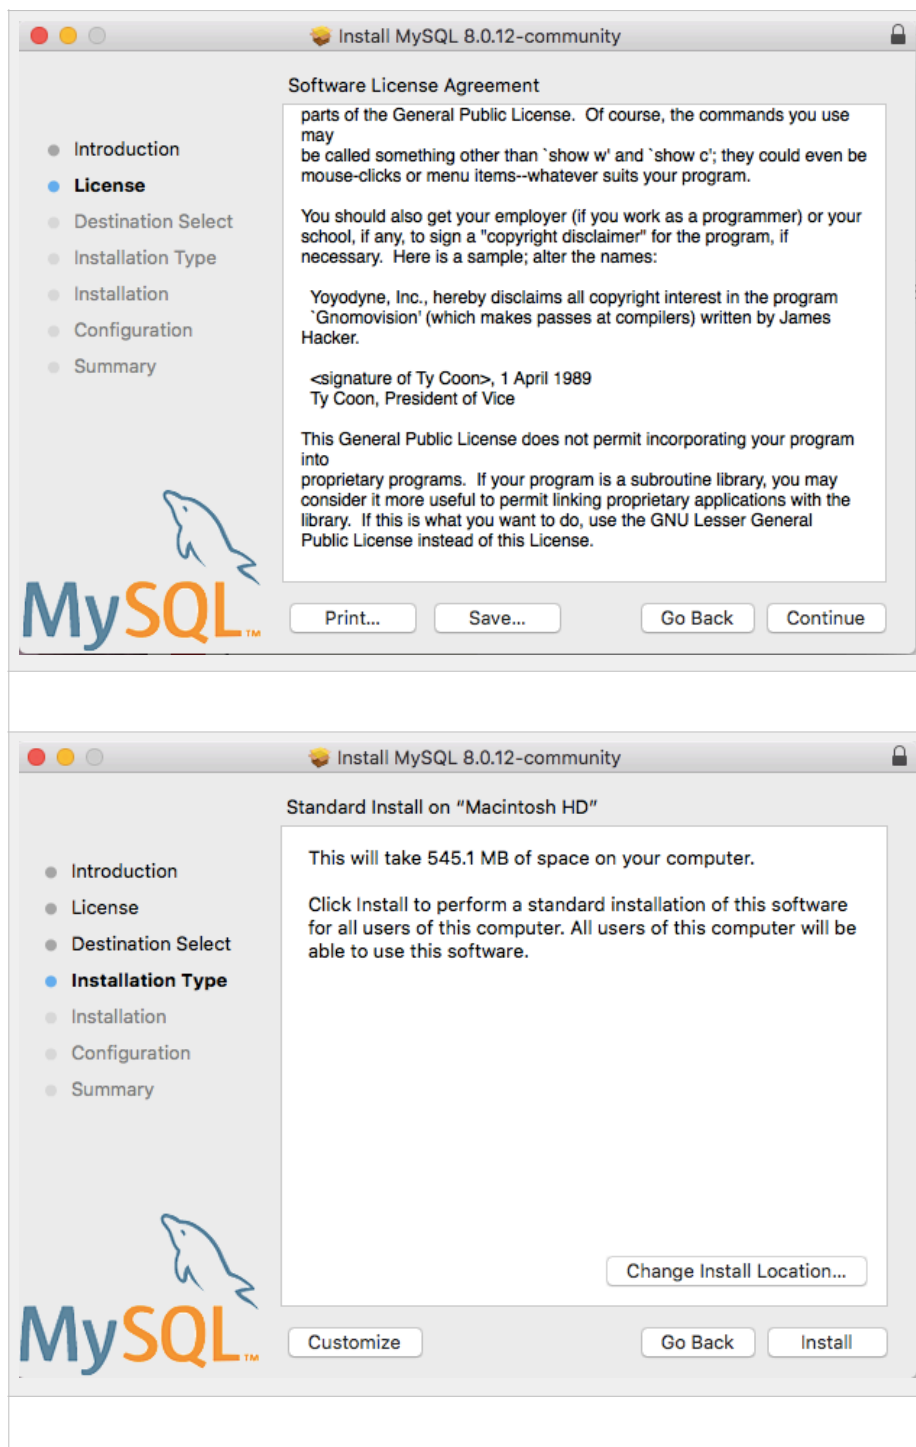

Client Side	Server Side
	Localhost: 127.0.0.1
MySQL Workbench	MySQL Server 8.0.12

Task 1: MySQL Community Server Installation and Configuration

Download: <https://dev.mysql.com/downloads/mysql/>

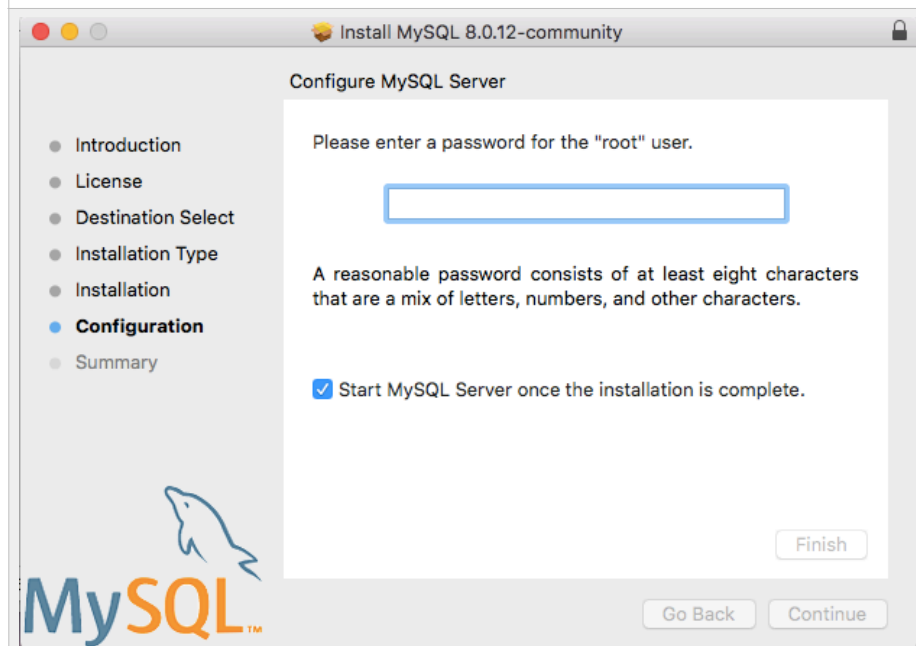

Documentation: <https://dev.mysql.com/doc/refman/8.0/en/>

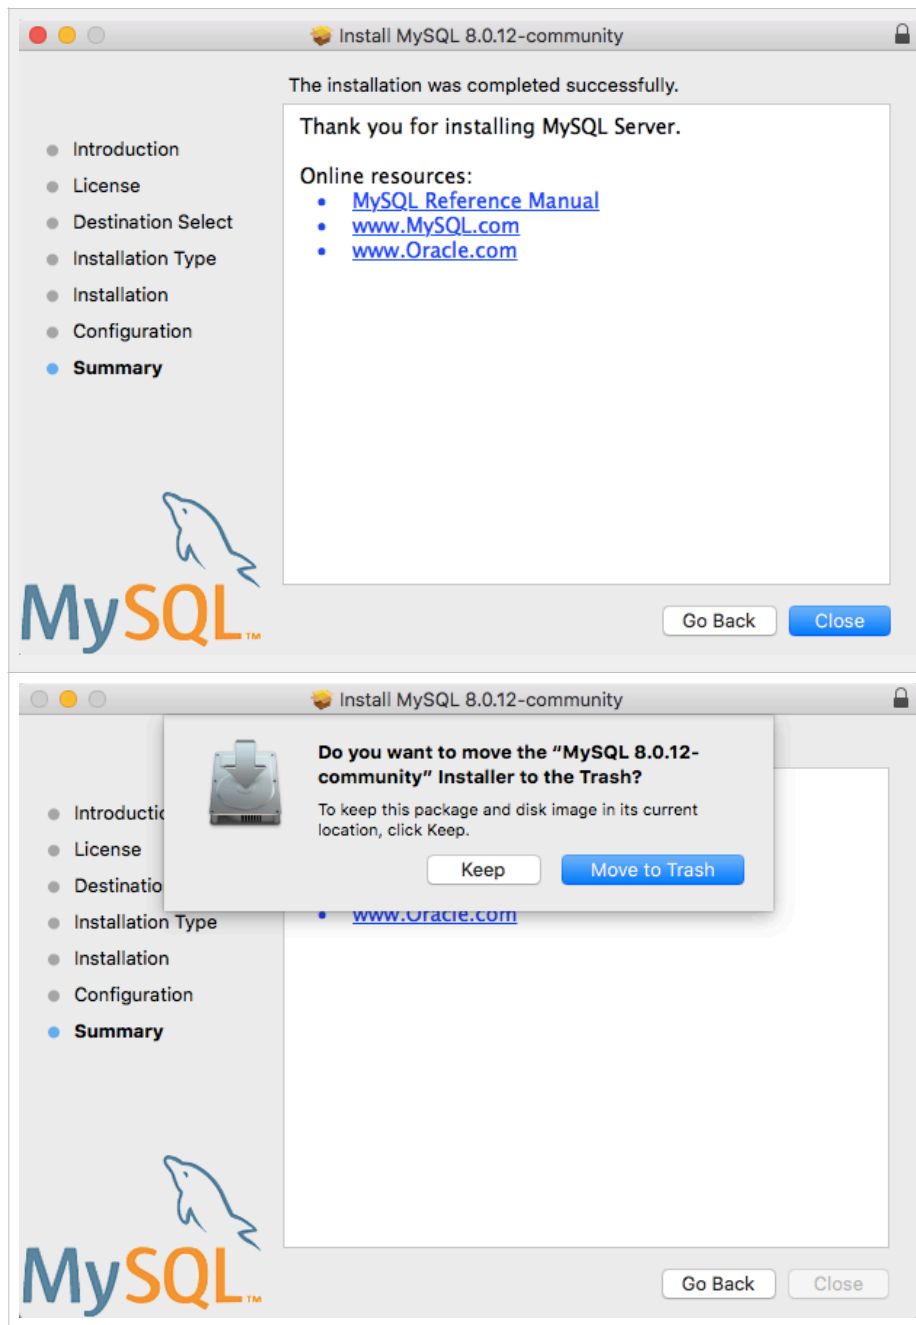

- Use Legacy Password Encryption

- You can create your own password of the Root user and please REMEMBER your password.

Basic MySQL Command Summary

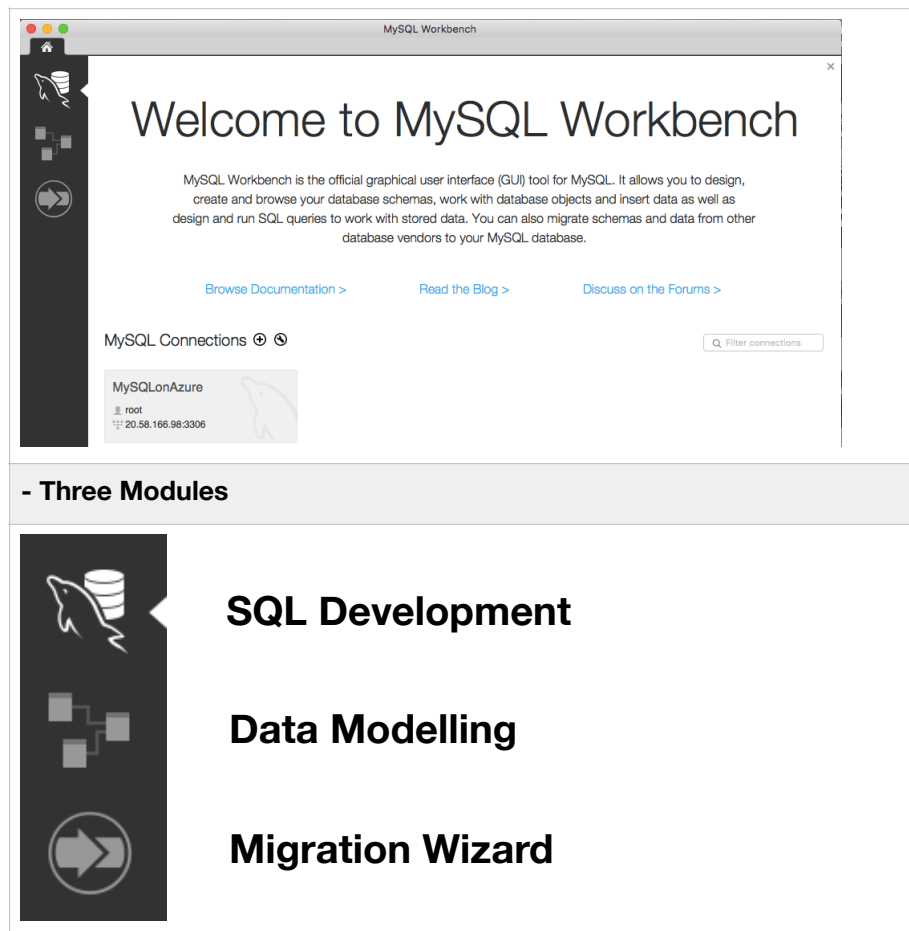

- Open the Terminal/Command Prompt and run the following commands:
 - `mysql -u root -p - h localhost`
 - `show databases ;`
 - `use [database_name] ;`
 - `show tables ;`
 - `describe [table_name] ;`
 - `select * from mysql.user \G`
 - `show grants for 'root'@'localhost' ;`
 - `exit`

Task 2: MySQL Workbench Installation and Configuration

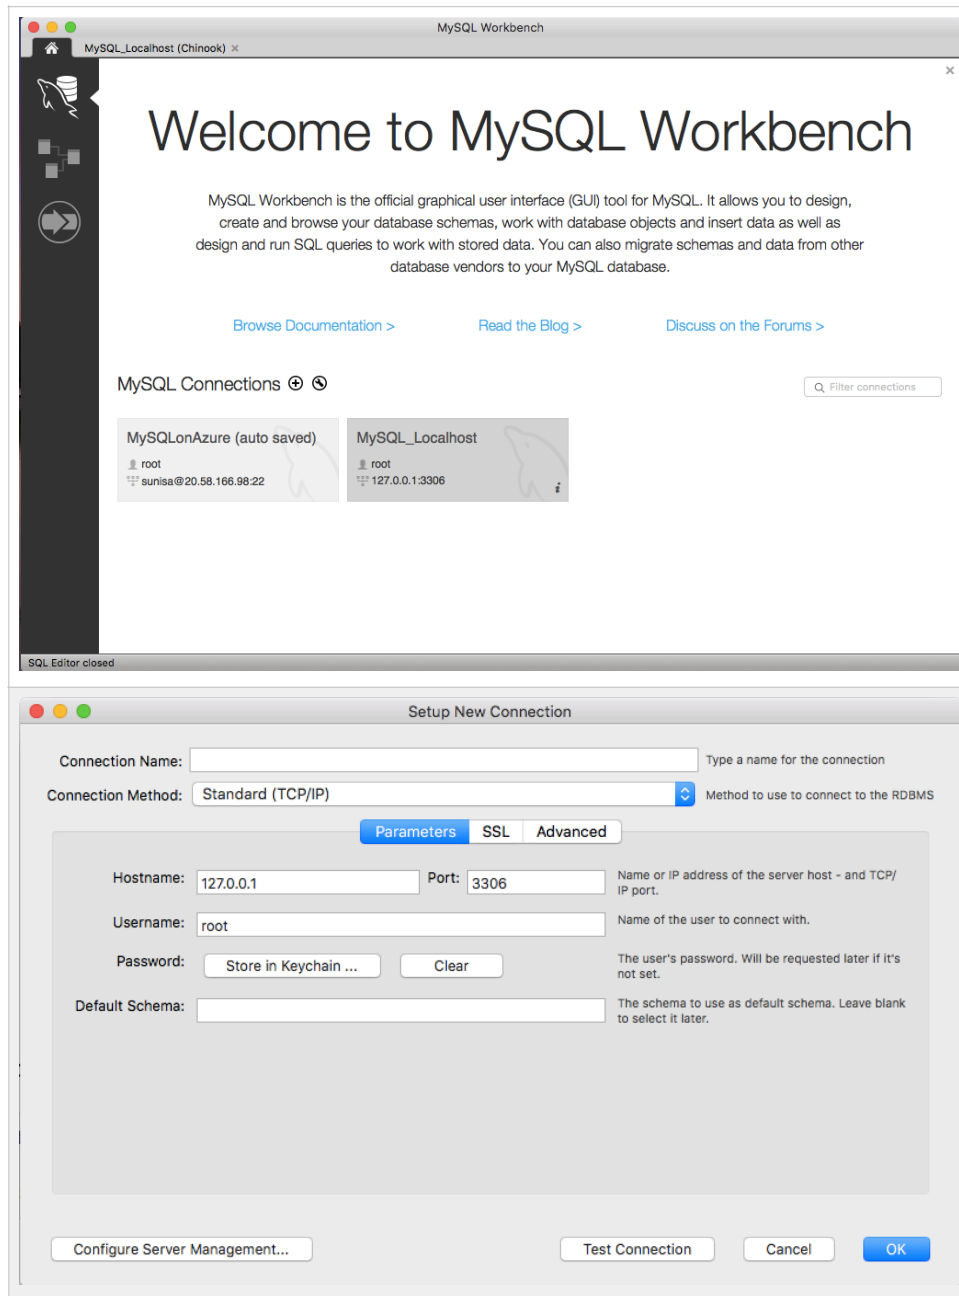

Task 2.1: Installing

- Download: <https://dev.mysql.com/downloads/workbench/>
- Source: <https://dev.mysql.com/doc/workbench/en/wb-installing.html>

Task 2.2: Creating A New MySQL Connection

Tutorial: <https://dev.mysql.com/doc/workbench/en/wb-getting-started-tutorial-create-connection.html>

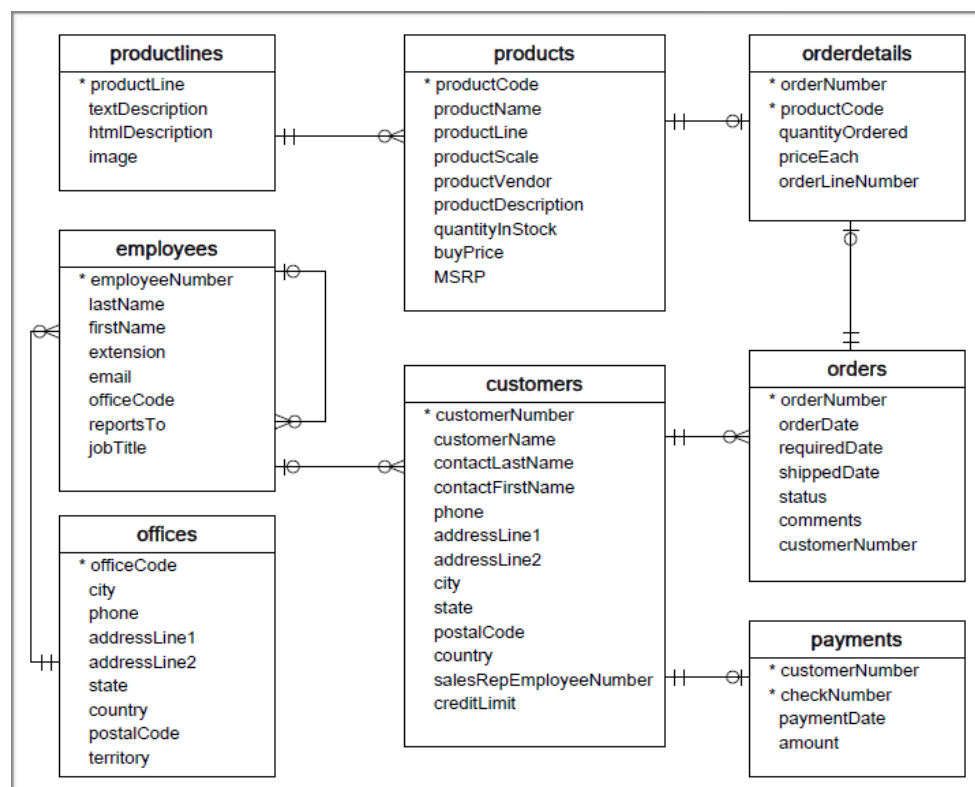

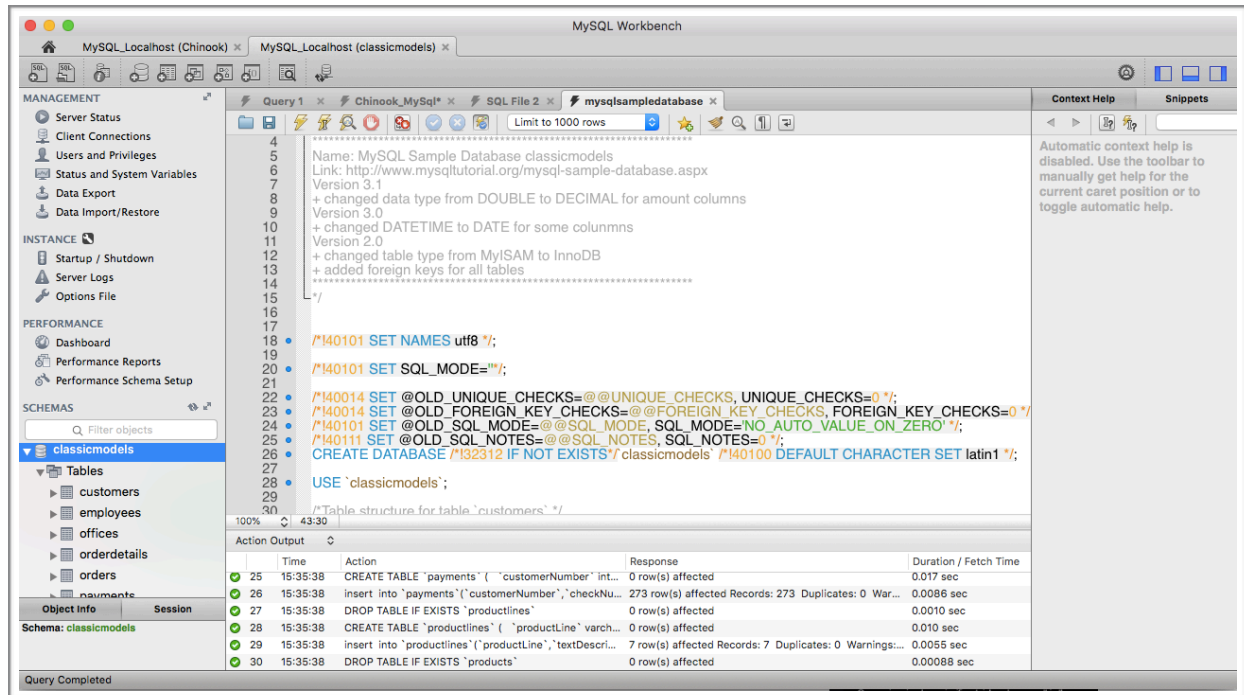

Task 3: Creating a new database named “classicmodels”

Source: <https://www.mysqltutorial.org/mysql-sample-database.aspx>

The `classicmodels` database is a retailer of scale models of classic cars database. It contains typical business data such as customers, products, sales orders, sales order line items, etc.

- Download and run a script named “mysqlsampledatabase.sql” from MS teams/LEB2

- Try to type SQL statement to retrieve data from the Classicmodels database.
